

# SUCCESS !!

My 13 month old son Chase had suffered with constipation since birth. We had been treating him with a limited diet to relieve his constipation. He also had difficulty learning to stand.

We came to see Dr. Dent when he was about 9 months old. What I enjoyed most about the office was Dr. Dent's gentle care, friendliness, and playfulness with my son.

Chase now has regular "normal" bowel movements and his legs are the same length thanks to Dr. Dent adjusting his atlas.

**He has started walking!!!!**

Dr. Dent is one of the most caring, intuitive doctors I've had the pleasure of working with and she truly wants to help her patients. I only wish I had brought my son in sooner!!

I hereby give my permission to publish my success story in whole or to summarize its contents in any of the publications of the Harbor Bay Clinic.
