

# SUCCESS!!

I thought I would give HBCC a try after my wife was miraculously treated and I'm very grateful I did. I initially came in for my neck, shoulder, and headache pain that I had been experiencing for many years.

After Dr. Dent gave me a thorough examination, she found that my Atlas was out of alignment. This caused my head to have a slight tilt and was pinching nerves that were triggering my shoulder pain and headaches. After a handful of visits and revamping my sleeping positions, my pain has nearly disappeared.

The most enlightening part of my treatment was something I would have never in my wildest dreams thought chiropractic care could correct. I have been suffering from heartburn for nearly 15 years. I have seen doctor after doctor who would prescribe me every possible heartburn medication available because over time they would all stop working... or so I thought.

Unbeknownst to me, the spine holds the vital nerves that control the digestive system. After Dr. Dent took me to school, she quickly identified and focused her adjustments like a laser on my stubborn vertebrae and has sense eliminated my heartburn.

Who would have thought seeing a chiropractor could fix heartburn? And all these years I have been masking my pain with useless medications. I now view chiropractic care in a completely different light and thoroughly enjoy singing her praise to all of my family, friends, and colleagues. Thank you Dr. Dent!

Very respectfully...and now well adjusted!

I hereby give my permission to publish my success story in whole or to summarize its contents in any of the publications of Harbor Bay Clinic of Chiropractic.
