

# SUCCESS!!

For about the past 8 years, I have been living with neck pain and its resulting severe headaches. This pain was as a result of osteoarthritis and numerous bone spurs growing on my vertebrae, pinching down on nerves. I made the usual efforts to alleviate the pain in my neck and head but met with very little success. I eventually ended up at a pain management facility where several less than comfortable steroid injections yielded nothing. Their final diagnosis was that I would need to undergo nerve ablation, a process of killing the nerves through electric shock, in order to realize any relief.

I had pretty much given up on a "cure" and managed to function through the use of over-the-counter pain killers, until about 6 months ago. While running some errands, I ran into a family friend who had been house-bound due to a number of physical ailments. I was shocked to see her out and about. Her response to my shocked expression was that she had found a wonderful chiropractor that had provided her relief when others had given up. Around the same time, I began some massage therapy to help me get through the week. At one of my first visits, the massage therapist recommended a chiropractor that had helped her overcome migraine headaches. Imagine my surprise when it turned out to be the same chiropractor recommended by my friend...Dr. Dent.

I took the first step and made an appointment for a consultation. I was very impressed. Dr. Dent was genuinely interested in helping me overcome my neck and headache issues. We began a treatment program the next week and the results have been way beyond my highest expectations. At best, I was hoping for some small reduction in the pain I was experiencing. In reality, my headaches have nearly disappeared and my neck pain has dissolved to only an occasional minor burning sensation.

I could not be happier with the results that Dr. Dent has provided, and I am extremely grateful for the chance encounter with two people who were able to provide the recommendation to see her. Hopefully, I can provide the same recommendation for others and they can experience similar results as I have at the caring hands of Dr. Dent.
